Education

Malla Reddy College of Engineering (Affiliated to JNTUH) — Hyderabad, India
Bachelor of Technology in Computer Science and Engineering (AI & ML) — *2022 – 2026*

- **CGPA:** 8.5 / 10.0, among top 10% of the cohort
- **Relevant Coursework:** Data Science, Machine Learning, Deep Learning, Computer Vision, Data Structures, Software Engineering
- Scored **100%** in Engineering Drawing

Sri Chaitanya Junior College, ECIL — Hyderabad, India
Intermediate Education (SSC) — *2020 – 2022*

- Scored **95.2%**

Takshasila Public School — Hyderabad, India
Primary and Secondary Education (CBSE)

- Scored **100%** in Mathematics
- Overall percentage: **81%**

Experience

Product Development Intern — June 2025 – Nov 2025
Urbanloop (Mobility Transit Innovations Pvt Ltd) — *Remote*

- Engineered and deployed three cross-platform mobile applications to the Google Play Store and Apple App Store using **React Native**.
- Designed high-fidelity user interfaces and brand assets in **Figma**, optimizing for cross-platform responsiveness and user engagement.
- Developed full-stack features by refactoring backend logic, managing database schema migrations, and overseeing production deployments.

ASP.NET Developer — Oct 2024 – Mar 2025
YAR Tech Services — *Remote*

- Architected an internal **Admin Panel** and an automated **Payslip Generation system** using ASP.NET and C#.
- Collaborated on the full software development life cycle (SDLC), including system design, coding, and unit testing to ensure high-performance web functionality.
- Identified and resolved critical bugs and performance bottlenecks, improving overall application stability and user satisfaction.

Projects

Subway Passenger Flow Forecasting System | *Django, Python, Machine Learning, Pandas, Scikit-learn* | Link

- Developed a machine learning-based web application to forecast subway passenger traffic using temporal and location-based features.
- Trained regression models on historical transit data to predict passenger entry and exit volumes across stations, achieving **RMSE of 18.6 and R^2 score of 0.87** on the test set.
- Implemented data preprocessing, feature engineering, and model inference pipelines to support reliable real-time predictions with **<150 ms latency**.
- Built an interactive Django interface enabling users to input parameters and visualize predicted traffic patterns from a model trained on **50K+ records**.

Tenexis | *Node.js, React, PostgreSQL, Docker, AWS, WhatsApp API, Cloudflare, Figma* | Link

- Architected and developed a full-stack marketplace platform enabling C2C transactions and carpooling.
- Designed scalable system architecture and PostgreSQL schemas to support search relevance and future recommendation systems.
- Implemented REST APIs and event-driven workflows for real-time notifications and user interactions.
- Deployed infrastructure using AWS, Docker, and Cloudflare ensuring 99.9% availability.

- Collaborated on UI/UX design using Figma to build responsive and user-centric interfaces.

UniScreen – Smart Campus Display System | *Full Stack, AI Content Generation* | Link

- Developed a centralized platform for managing campus-wide digital displays with real-time content distribution and scheduling.
- Implemented AI-driven content generation for MCQs and viva questions, reducing manual creation time from up to 1 hour to seconds (**90–95% faster**) while enabling quick review and iteration.
- Designed role-based access control and analytics dashboards to monitor content engagement and system health across **50+ users and 20+ screens**.
- Built scalable backend services to support real-time updates and multi-device synchronization with <**200 ms latency**.

JNTUH Notes & Scraper | *Python, BeautifulSoup, SQL, JavaScript* | Link

- Developed a centralized academic portal and automated scraper for extracting and organizing student results.
- Built data pipelines to store and manage structured academic data for easy access and reporting.

Technical Skills

Languages: Python, JavaScript, C#, Java, SQL (PostgreSQL), HTML/CSS
Machine Learning & AI: Scikit-learn, TensorFlow (basic), NLP, TF-IDF, feature engineering, model evaluation, recommendation systems, Pandas, NumPy
Frameworks: React, React Native, Node.js, ASP.NET, Next.js, Django, WebSockets, Electron.js
Developer Tools: Git, Docker, Figma, VS Code, Visual Studio, Postman, AWS, Adobe Creative Cloud, Microsoft Office, Blender, OBS Studio
Libraries: Prisma, Express.js, Tailwind CSS, shadcn

Certifications

Full-Stack Web Development Bootcamp: Comprehensive MERN Stack training - Udemy | Verify
Machine Learning A-Z: AI, Python & R + ChatGPT [2025] - Udemy | Verify
Business Analytics & Data Mining: Modeling using R Part II - NPTEL | Verify

Achievements

GATE 2026 (Data Science and Artificial Intelligence): Score 353, AIR 9596 out of 69,242 candidates, conducted on February 15, 2026.

Academic Excellence: Scored 100% in Engineering Drawing during B.Tech 1st year.

Academic Excellence: Scored 100% in Mathematics in Class X CBSE.

Positions of Responsibility

Design Head, Plexus Club, MRCE: Led the design function, defining UI/UX direction and maintaining visual consistency across deliverables.

Student Coordinator, NSS, MRCE: Coordinated student activities and supported event execution and campus engagement initiatives.
